The NASA program has been an ongoing effort since 1991 to offer AGC members an opportunity to evaluate and be recognized for their safety records. NASA compares a member's safety record with other AGC members according to size and construction type.

AGC contractor members must participate in the NASA program for three consecutive years in order to be eligible for recognition. The 2009 program award recipients participated in the program in 2008, 2007 and 2006.

The entry forms for the 2010 program will be mail to all Building Chapter "general contractor" members early in January. You must submit safety data for 2007-09 via a provided entry form to be eligible for the 2010 awards announced next fall.
