RE: Letter of Recommendation

To whom it may concern:

Beckenhauer Construction has been the Construction Manager/General Contractor for a significant building and renovation project at Cherry County Hospital. The project had four different phases including the patient rooms, surgery, support services, and outpatient departments. The project was approximately three years in its entirety. Substantial accommodations were required during the project.

The Beckenhauer staff was extremely knowledgeable, flexible, polite, and accommodating during the entire project. Their knowledge of how a healthcare institution needs to function was very helpful as we moved through the different phases. They were very helpful in finding solutions as we had to adapt and maintain services. During the course of the project a feeling was developed by the hospital staff that the Beckenhauer were part of the hospital.

It would be my recommendation to the governing body to utilize Beckenhauer again. I have appreciated the professionalism and expertise demonstrated by all members of the Beckenhauer firm.

Respectfully,

Brent A. Peterson  
Chief Executive Officer
