Dear Bill:

I would like to express my extreme satisfaction with our new bank building in Leigh, Nebraska.

Your design team gave us all the features we wanted in the building and the exterior look we were hoping for. Your team managed to fit the project on the lot size available to us.

Your on-site supervisor, Mr. Joey Thoene, did an excellent job managing the project. Under his supervision the project was completed on time, even with changes that we wanted after construction was underway. The worksite was always tidy. Meetings with bank representative and subcontractors were conducted professionally. Removal of the old structure was clean and efficient.

The final project is exactly what we had hoped for. Construction is of high quality. The materials used are wonderful. Minor follow-up issues were handled courteously and promptly. As expected the Leigh community has embraced the structure and it is a source of pride for the community.

Again, we are delighted with the job done by all involved and would recommend your company to others.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Steven R. Ausdemore'.

Steven R. Ausdemore
President.
