Re: University of Nebraska at Kearney  
Bruner Hall of Science Addition and Renovation

Dear Mr. Beckenhauer,

I am excited to hear that Beckenhauer Construction has decided to submit Bruner Hall of Science at the University of Nebraska at Kearney for an AGC Build Nebraska Award.

The addition and renovation to Bruner Hall of Science was an extremely challenging project. Beckenhauer Construction faced stringent phasing requirements and a series of critical deadlines in order to allow the building to remain functional throughout the entire period of construction. The phases were timed to work within the academic calendar of the University, which allowed little leeway for all of the scheduled completion dates. Your firm not only met those deadlines, but in many cases completed work ahead of schedule without one ounce of compromise to the quality of the workmanship. Beckenhauer's Project Manager and Project Site Superintendent did an outstanding job of managing your entire subcontractor labor force to meet each and every challenge the project demanded. This coordinated effort resulted in a seamless and integrated project from start to finish.

The entire staff of Beckenhauer Construction needs to be congratulated on an incredible effort. The project was completed ahead of schedule and the finished product has exceeded every expectation of the User Groups and the University. It was a pleasure working with you on this project and I look forward to our continued working relationship in the years to come.

Sincerely yours,

Gregory S. Lattig, AIA
