Re: Freeman FB/Track Stadium upgrade
Freeman High School, Freeman, SD 57029

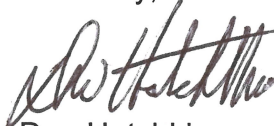

Mr. Bill Beckenhauer:

I just wanted to drop you a note and tell you how much we have appreciated working with you relative to our renovation project. Although probably not the largest project you have been involved with, none the less, your level of commitment and concern for a quality outcome was evident from the beginning.

The expertise that you displayed and the knowledge of quality subcontractors that were hired and brought on board for our project was top notch, and as a result, we have a restoration of our stadium that will last many years. The School Board and community in general, have all been impressed with the outcome and are very appreciative of the work that you and your staff did for us. From the initial inspection of the facility to managing and inspecting the final product, you have done an outstanding job.

The Freeman Public Schools would welcome an opportunity to talk to prospective clients of Beckenhauer Construction relative to the committed excellence that you bring to the table. We would offer you our highest recommendation and would have no reservations supporting Beckenhauer Construction in the future. Again, thanks for your expertise, quality control and friendship.

Sincerely,

Don Hotchkiss
Superintendent
