RE: Reference Letter from Faith Regional Health Services

Dear Joe,

In October 2019, Faith Regional Health Services partnered with Beckenhauer Construction to construct the linear accelerator addition to the Carson Cancer Center. This project's timeframe overlapped the COVID-19 pandemic and was still completed on schedule.

The Beckenhauer team lead by Gary Nelson, Superintendent and Dean Uhlenberg, Project Manager maintained a clean and safe construction zone; and minimized the impact of the demolition and renovation on our patients and staff. Throughout the project, timely project status updates and clear communications ensured seamless coordination between the project team and Faith Regional staff. The Beckenhauer project team proved easy to work with, professional and were willing to adjust schedules to work around the patients with limited interruptions of service. The final result is an addition that is both aesthetically pleasing and provides essential and excellent patient care.

The addition of the linear accelerator to the Carson Cancer Center supports the Faith Regional Vision to provide the most comprehensive, high quality health services to the residents of northeast Nebraska. Faith Regional was proud to partner local with Beckenhauer Construction for this important project.

Sincerely,

Thomas J. Lee, FACHE  
Vice President of Support and Ancillary  
Faith Regional Health Services
