June 29, 2007

To Whom It May Concern:

We had our 10,000 square foot facility planned, designed and built by Beckenhauer Construction in the Spring of 2007.

From start to completion we had multiple lines of communication with their project management team and the communication was responsive to our decision making needs. Beckenhauer Construction took the time to think through different scenarios for us in building our facility and helped us pick not only the best, most qualified sub-contractors, but the best material for our dollar. Initially we worked with Buster Beckenhauer on sites, selecting an architect and timeline. The experience offered to us in those meetings is something you cannot put a dollar value on. We had the pleasure to work closely early on with Mark Riley, then Bill Barritt, who was our project manager and Joe Beckenhauer, who was our superintendent. All three were responsive to questions, getting us answers and meeting us on time to go over the project. Those three work closely together and communicate well between them. We had no dropped or lost decisions in our project.

From a financial point, we came in under budget on a project that took nine months to complete from September 2006 to June 2007. For a 10,000 square foot facility and signing on with a contractor to lead the project I don't think you could ask for a more qualified team than Beckenhauer Construction.

Feel free to personally call me at 866-371-7407 toll free or 371-7407, or email, [heartlandpt@cablone.net](mailto:heartlandpt@cablone.net). We highly recommend Beckenhauer Construction for any type of project that you may have in mind.
