RE: Letter of Recommendation

To whom it may concern:

Beckenhauer Construction has been the general contractor on our completed patient room and ancillary department renovation project. The project, originally scheduled for 30 months, was completed five months early. This multi-phase project required extensive planning to enable the construction to progress forward, while at the same time allow the hospital to continue to provide care to the community. All of this has been accomplished in an efficient manner ahead of budget.

The team from Beckenhauer, that we have had the pleasure to work with, has been professional and respectful of our staff. Our staff has had nothing but positive comments about how friendly they are and how easy they are to work with. Beckenhauer has also done an excellent job in coordinating sub-contractors and holding them accountable to timelines and high quality work.

While I don't anticipate another project in the near future, I would not hesitate to use Beckenhauer Construction again should that occur. I would highly recommend Beckenhauer for your future construction needs and would be willing to address any questions that you may have.

Sincerely,

Chad Jurgens
