To Whom It May Concern,

As Chief Executive Officer of Jefferson Community Health and Life in Fairbury Nebraska, I thoroughly enjoyed working with Beckenhauer Construction as our General Contractor on our Rural Health Clinic. The project involved building a new 21,000sqft rural health clinic. In addition to the construction project, we asked to have a few other tasks completed including a remodel of our CT scanner room and addition parking in our parking lot.

From the beginning of the project Beckenhauer Construction took a very proactive approach. He provided me with nearly all of the required submittals prior to issuing a notice to proceed with his crew. By doing this, we were able to ensure a reduced amount of change orders and had time to revise or revisit areas of the project before any actual work began.

Beckenhauer Construction was very responsive to our questions and was able to get back to us with answers in a very timely manner. When design issues occurred, Beckenhauer Construction provided valuable and mutually beneficial suggestions to keep the project on schedule considerably. The onsite staff was very respectful and accommodating to our needs and went above and beyond helping us ensure a safe and clean work environment.

This Rural Health Clinic project was a success because of Beckenhauer Construction. If you need any additional information regarding his performance, please feel free to call me at 402-984-5388.

Sincerely,

A handwritten signature in blue ink, reading "Dr. Burke N. Kline", written over a horizontal line.
