RE: Letter of Recommendation for Beckenhauer Construction, Inc.

To Whom It May Concern:

On behalf of Stanton Community Schools, I am pleased to provide this letter of recommendation for Beckenhauer Construction, Inc. (BCI) in recognition of their support and partnership throughout our elementary school bond project.

Working with Beckenhauer Construction has been a positive experience. Their team has demonstrated professionalism, responsiveness, and a genuine commitment to helping our district move forward with this important project. Throughout the planning and design process, BCI has been a valuable partner, helping us evaluate options, consider cost-saving measures, and work toward a project that meets the needs of our students, staff, and community while being mindful of taxpayer dollars.

Our district is excited about the opportunity to build a new elementary school, and we appreciate BCI's guidance and collaboration as we prepare for construction. Their willingness to work alongside our district and other project partners has helped us move closer to making this vision a reality.

I would confidently recommend Beckenhauer Construction, Inc. to other school districts and organizations seeking a construction partner that values collaboration, communication, and responsible project planning.

We appreciate our partnership with BCI and look forward to breaking ground and continuing to work together as this exciting project moves forward.

Sincerely,

Darren Soucie
Superintendent
