Beckenhauer Construction
1901 Riverside Blvd.
Norfolk, NE 68701

Dear Mr. Beckenhauer,

I would like to offer a positive endorsement for the wonderful job your construction company did to complete the building of Spier Physical Therapy. This has been a dream of mine for the past twenty years and your company has been an important part of bringing this dream to life.

I would like to especially commend Bill Beckenhauer and site supervisor Joey Thoene for working diligently with my wife and I to complete this immense project. They worked extra long hours and weekends and did whatever it took to complete any task big or small. They did an excellent job of choosing sub-contractors that worked well together and did high quality work. Everyone at Beckenhauer seemed to represent the company in a positive and professional manner with the confidence that they could complete the job on time and with the highest quality possible.

It took a lot of hard work but the whole staff at Beckenhauer Construction dedicated themselves to successfully completing this project into a beautiful building and a symbol of the future of physical therapy in Northeast Nebraska.

Sincerely,

Mark Spier, MS,PT/President
