VALLEY COUNTY COURTHOUSE

Client: Valley County
Completed: April, 2007
Location: Ord, NE
Size: 40,000SF
Services: Construction Management
Industry: Community Facilities

Project Summary:
This was a HVAC, electrical, and window renovation to the courthouse. This is an older, historical type courthouse wherein the commissioners desired to maintain the historical look of the building to greatest extent possible. We were able to bring forth a mechanical option that would give the building greatly increased energy efficiency while maintaining the historical aesthetics of the courthouse. New windows that complemented the original design were also incorporated into the project. All renovations were completed while the Courthouse was in operation.
